REFERENCE COPY OF TECHNICAL DOCUMENTATION FOR ACCESSIONED ELECTRONIC RECORDS (Copied: April 20, 2001)

Documentation for the Korean War Casualty File (TAGOKOR), 1950-53

Record Group 407 Records of the [U.S. Army] Adjutant General's Office

The National Archives and Records Administration (NARA) has been accepting electronic records into its holdings since the early 1970s. Technical documentation has accompanied each transfer of electronic records. The documentation is necessary to understand the meaning of the digitized bits of information within the electronic records.

Over the decades, NARA has had different procedures for compiling technical documentation into an organized unit for researchers, and different expectations regarding the content and extent of any NARA-produced portions of the documentation. Consequently, the structure, organization and contents of the documentation reflect the procedures in place when the technical documentation was compiled and arranged and may include out of date addresses, telephone numbers, or other items of unrevised information related to the agency that created or transferred the documentation and electronic records to NARA, to the NARA unit that processed these materials, or to the physical media of the electronic records files.

In creating the reference copy of the documentation package, NARA staff have selected from the technical and/or supplementary documentation available for this series or file(s). We have annotated or highlighted the table of contents that follows to indicate which portions of the full documentation for this series or file are included in this reference copy of documentation. Any materials not included here are available upon request. Any user notes prepared after the table of contents was prepared appear before the table of contents. This documentation will differ in structure, organization and contents from technical documentation for other series or files of accessioned electronic records. The readability and visual quality are also variable.

Supplementary User Note

Records on Korean War Dead and Wounded Army Casualties, 1950-1953 ([U.S. Army] Korean Conflict Casualties File (TAGOKOR))

In Records on Korean War Dead and Wounded Army Casualties (TAGOKOR), the agency did not provide a meaning for the code “D” in the Year of Disposition (YEAR_DISP) field. The code “D” appears in the Year of Disposition field in approximately 626 TAGOKOR records, including duplicate records. Staff was able to compare approximately 610 of those records with corresponding records in the Defense Prisoner of War/Missing Personnel Office’s (DPMO) Personnel Missing – Korea (PMKOR) Database (available on the DPMO website); specifically comparing the Year of Disposition field in the TAGOKOR records with the year listed in the Date of Death field in the PMKOR Database records. This comparison showed that for most, but not all, of the TAGOKOR records the code “D” in the Year of Disposition field means the year “1954.”

User Note

[U.S. Army] Korean War Casualty File (TAGOKOR), 1950-53

Records of the [U.S. Army] Adjutant General's Office
Record Group 407
February 26, 2001

In February 2001, the file known as TAGOKOR was formally verified using the Archival Electronic Records Inspection and Control Utility (AERIC). This file contains a number of inconsistencies between the documentation and the data and a number of fields containing no data. These inconsistencies reflect the use of the records for administrative purposes and not necessarily for statistical analysis. Therefore, researchers will discover numerous mis-codings ("typos") in a number of fields. The AERIC verification report with select distinct verifications of a number of fields provides frequencies for many fields. Researchers can use this to identify mis-codings in these fields. Additionally, the reference services staff has extensive knowledge of these records and is familiar with many of the idiosyncrasies of them.

Interpreting Unit Information in TAGOKOR

Unit information in the TAGOKOR data file is compiled in three interdependent data elements: Troop Sequence Number, Element Sequence and Unit Number. Alone, none of these data elements are complete, but together they can indicate an exact unit at a certain level. These codes were created under SR 330-105-1 Statistical and Accounting Systems for the purpose of creating "the troop program and troop list (parts I through IV for the active establishment and civilian components), the Army mobilization plan, and allied planning documents." TAGOKOR is one of the uses to which these codes were put, but the codes were not included in the TAGOKOR documentation. For this reason, pages 10-30 from Army publication SR 330-105-1 are necessary to decode these data elements. Photocopies of these pages are available from the Center for Electronic Records and have been condensed to fit on eleven pages.

Troop Sequence Number (TPSN), Characters 66-70: The TPSN is the most basic element of unit information. It indicates the general type of unit in which the casualty served (infantry, anti-aircraft, headquarters, etc.), and sometimes indicates a specific division. The first digit in a TPSN number is the "category" of the TPSN.

Element Sequence, Characters 71-72: The Element Sequence only appears for certain TPSN codes. It exists if the type of unit needs to be specified further than it has been in the TPSN. For instance, if the TPSN gives a specific infantry division, the Element sequence may further specify the unit as a regiment.

Unit Number, Characters 73-76: This four digit code indicates the numeric designation of the most specific unit indicated by the TPSN and, if applicable, the Element Sequence.

There are four different cases of unit information in SR 330-105-1. The case used in an individual record depends on the category of the TPSN. The cases and their corresponding categories are: Field Combat Type Divisions (categories 0-1); T/O&E Organizations other than divisional (categories 2-5); T/D organizations and detachments of trainees, students, enlistees, transients and patients (categories 6-8); and Miscellaneous Organizations (category 9). You can immediately tell which case you are working with by looking at the category, or the first digit in the TPSN.

Field Combat Type Divisions

Field Combat Type Divisions are the most common TPSN codes in TAGOKOR by far. Any TPSN beginning with "0" or "1" indicates a combat division. The second digit in the TPSN indicates what type of combat division. Pages 12-13 SR 33-105-1 shows that the second digit 4 is for an airborne division; 5 is for an armored division; 6 is for a cavalry division and 7 is for an infantry division. The remaining three TPSN digits in this case indicate the divisional number. For example:

07025 = the 25th Infantry Division

14101 = the 101st Airborne Division.

Once the division type and number has been established, the Element Sequence indicates the type of unit within the division to which the casualty was assigned. For this, it is necessary to check column 2 in the tables on pages 12-13 of SR 330-105-1. These are the Element Sequence codes and they match to column 5 to indicate the type of unit. There should always be an Element Sequence when the TPSN indicates a Field Combat Type Division. To continue the examples above:

0702560 = 25th Infantry Division, Infantry Regiment

1410186 = 101st Airborne Division, Glider Field Artillery Battalion.

Finally, the Unit Number in Field Combat Type Division TPSN records gives the number of the unit specified in the TPSN and Element Sequence. To complete the above examples:

07025600058 = 25th Infantry Division, 58th Infantry Regiment

14101860271 = 101st Airborne Division, 271st Glider Field Artillery Battalion.

T/O&E (Table of Operations & Equipment) Organizations other than divisional

If the TPSN begins with a 2, 3, 4 or 5, you are dealing with this case of TPSN. It is necessary to consult pages 13-25 of SR 330-105-1 to locate the TPSN code and interpret it. The codes in this case are arbitrarily assigned to approximate alphabetical order and have no greater significance. Two examples drawn from the tables in SR 330-105-1 are:

35380 = Light Equipment Engineer Company

42635 = Military Intelligence Interrogation Detachment

Normally, there is no element sequence in this case of TPSN codes, however the field does occur in rare instances. SR 330-105-1 illustrates that Element Sequences exist for the following T/O&E Organizations other than divisional: 24--, 27--, 44-- and 45--. In these cases, use the methods outlined for Combat Type Divisions.

The Unit Number generally outlines the specific unit type described in the TPSN for T/O&E Organizations other than divisional. To complete the above examples:

35380_0289 = the 289th Light Equipment Engineer Company

42635_1733 = the 1733rd Military Intelligence Interrogation Detachment

T/D (Table of Distribution) organizations and detachments of trainees, students, enlistees, transients and patients

If the TPSN code begins with a 6, 7 or 8, you are dealing with T/D units of the administrative and logistical base (category 6), training base (category 7) and detachments of trainees, students, enlistees, transients and patients (category 8). Category 7, training base, has special characteristics and is covered after 6 and 8 below.

For category 6 and 8, the second and third digits in the TPSN code indicate the type of mission the unit has. The fourth digit of the TPSN is an arbitrary numeric code used to differentiate between similar units. The fifth digit of the TPSN indicates a project code corresponding to nine major projects of the U.S. Army.

The nine projects are:

1 - Procurement & Production

2 - Construction

3 - Maintenance of Structures

4 - Operation & Maintenance of Chattels

5 - Education & Training

6 - Research & Development

7 - Departmental Service

8 - Training Phase (Trainees)

9 - Civil Functions, Reimbursables

Pages 25-30 of SR 330-105-1 contain the codes for this case of TPSN code. Two examples:

61724 = Postal Courier Unit

81554 = Replacement En route to Overseas

Category 7 TPSN codes are broken down somewhat differently. The first digit, 7, indicates that the unit is a T/D training division. The second digit indicates the branch of the division as follows: 7 - Airborne; 8 - Armored; 9 - Infantry. The third and fourth digits represent the last two digits of the division number. The fifth digit indicates the project as described above (usually 5 or 8). For example:

79055 = 5th Infantry training division, overhead and instructors

79058 = 5th Infantry training division, trainees/students/enlistees

Element Sequence and Unit Number fields apply to categories 6, 7 and 8 just as in category 0 and 1, but do not necessarily appear everywhere.

Miscellaneous Category

Category 9 TPSN's cover other units that do not fall within the normal categories. They generally apply to inactive reserve type units. The codes for them are on page 30 of SR 330-105-1.

Abbreviations Used in SR 330-105-1

SR 330-105-1 pages 10-11 contain some, but not all of the abbreviations that appear on the tables on pages 12-30. Many of the missing abbreviations can be interpreted using logic. For instance, the Element Sequence "74" under airborne division appears on the table as "PRCHT INF RGT." The last two abbreviated words are clearly "Infantry Regiment," and one can logically assume that since this is an airborne division unit, the "PRCHT" stands for "Parachute." Not all of the abbreviations are so obvious, and some may require some secondary source research to fully decipher.

Final Note on TPSN, Element Sequence and Unit Number

These codes were created by the U.S. Army to serve a variety of purposes. The creators of the TAGOKOR file used them in their database to give further detail to the records they were keeping. It must be kept in mind that not all of the codes described above necessarily appear in TAGOKOR. For instance it is doubtful that any soldiers were wounded or killed in Korea while assigned to TPSN code 60689 (duty at the National Cemetery in Arlington, VA). Some of the codes, especially those with ambiguous abbreviations in the attached documentation, may raise further research questions, but they should all supply at least some valuable information given this documentation.

Sample Dump of the [U.S. Army] Korean War Casualty File (TAGOKOR), 1950-53

Records of the [U.S. Army] Adjutant General's Office
Record Group 407

Following is a page copied from a sample of records printed from the [U.S. Army] Korean War Casualty File (TAGOKOR), 1950-53, data files, created from the records as preserved by the Center for Electronic Records (preservation job 90-0116). In September 1989 the Data Processing Division, USADATCOM, Adjutant General's Center (TAGO), Department of the Army formally transferred one reel of magnetic tape and corresponding documentation for TAGOKOR to the Center for Electronic Records of the National Archives and Records Administration. This reel had been located at the National Personnel Records Center, St. Louis, MO. The [U.S. Army] Adjutant General's Office transferred the data to the National Archives on 9-track magnetic tape, in EBCDIC, with fixed length records, and IBM standard labels. These files were initially preservation copied by the National Archives on to 9-track, 6250 bpi magnetic tape in EBCDIC, with IBM-standard labels. The file was later re-preservation copied onto 18-track, 37,871 bpi, 3480-class tape cartridge in EBCDIC, with IBM standard labels (see preservation job 96-7930).

Korean War Casualty File

TO Dir, Adm Svc Div, TAGO
ATTN: AGAR

FROM CG, USADATCOM

DATE 22 JAN 1965 CMT-1

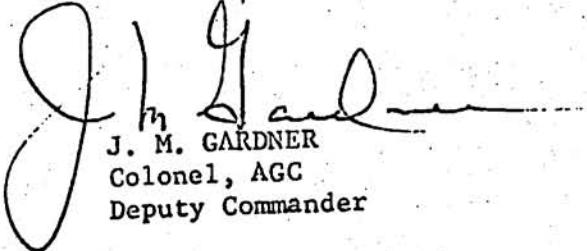

Mr. Reed/mlm/74564

1. During the month of April 1964, a representative of the Comptroller, TACO conducted a general management survey of the Data Preparation Branch, Data Processing Division, USADATCOM. The survey report subsequently received from that official included a recommendation that action be taken to convert the punched card file of Korean War casualties to magnetic tape. The objective of this recommendation was to dispose of a relatively inactive file of approximately 110,000 punched cards.

2. In response to that recommendation, a plan was developed to convert the card file to two identical magnetic tape records sequenced alphabetically by state, county within state, and name within county. This sequencing of data was dictated by past experience indicating that future research activity would be based largely on requests from the general public for name listings by state and county of residence. The plan included provisions for (1) destruction of the card file, (2) retention of one tape by USADATCOM for a five-year period, and (3) shipment of the second tape, together with a listing, to the Army Records Center, St. Louis, Missouri. This plan was concurred in by Mr. Ollon D. McCool during a telephone conversation with Mr. Linton Reed, of this Command, on or about 20 July 1964.

3. Pursuant to that verbal agreement, a magnetic tape record and listing of the Korean War casualties are inclosed for storage at the Army Records Center. The listing (three volumes) is arranged in the same sequence as the tape record with each state beginning on a new page. Individual items of information contained in each casualty record are printed in separate columns. A key to the column headings, record format, and codes printed on the listing is also inclosed to facilitate its use as a source of historical information.

FOR THE COMMANDER:

J. M. GARDNER
Colonel, AGC
Deputy Commander3 Incl

SECTION I

INTRODUCTION

1. Purpose.—These regulations provide the procedures for initial classification, continuous classification, and separation classification for all enlisted personnel of the Army. They contain the means and methods by which personnel entering the service are evaluated initially in terms of education, experience, aptitudes, interests, and capabilities. They provide the techniques for determining entry military occupational specialty (MOS) and prescribe the procedures for the awarding and removal of MOS, the designation and redesignation of primary or potential primary MOS, and the classification into career fields as a means of proper assignment. They specify the means for reclassifying individuals into more appropriate MOS while in the military service and determining the essential classification data to be placed on the discharge certificates when separated from the service.

2. Definitions.—The following definitions apply to the terms used in these regulations:

a. Reception processing.—Reception processing is the prescribed procedure required for receiving, processing, and classifying into categories all manpower flowing into the Army, and the distribution of such personnel to units of the Army for training and duty assignments.

b. Military occupational specialty.—A military occupational specialty is the term used to identify an area of military job activities covering either one duty assignment or a group of duty assignments which require similar abilities for the performance of their significant tasks, and which may be performed either in whole or in part by an individual who is qualified to perform the entire group of tasks. See paragraph 2, SR 615-25-15.

APPENDIX I

GUIDE FOR CONVERSION OF OLD MOS's (IN TM 12-427)
TO NEW MOS's IN SR 615-25-15

SR 615-25-20 requires the conversion of all MOS's of personnel to the new MOS's contained in SR 615-25-15. Listed below are the old MOS and the new MOS to which these old MOS *may convert*. This list however will be used only as a guide to the possible conversions which may be made. It is not a substitute for the evaluation of the skills possessed by the individual under procedures prescribed in these regulations. The job descriptions of converted MOS must be examined along with the actual qualifications of the individual before actual conversions on the qualification card are accomplished. This procedure must be followed especially in those instances where the old MOS converts to a number of new MOS. In such cases the qualifications of the individual must be matched against each MOS job description in the group before an appropriate conversion can be made. Where no MOS's are listed for conversion of certain old MOS, it will be understood that such MOS's convert to a wide variety of MOS's and such conversions must therefore be on an individual basis only.

Old MOS	Title	New MOS
0004	Aerial Photographer (Designated Equipment).	1004, 3004, 1891, 2003
0013	Diesel Mechanic-----	1819, 3819, 1477, 8013, 8180, 3477

APPENDIX II

INFORMATIONAL ROSTER AND PERSONNEL
INVENTORY CHART

1. Informational Roster (fig. 2).—*a. Purpose.*—The Informational Roster is designed to serve two purposes:

- (1) To furnish the organization commander with a ready reference of the qualifications of the personnel of his command.
- (2) To supply current information as to the duty assignment of enlisted personnel to the personnel section.

AGO 27318

PROMULGATED SEPTEMBER 21

U.S. GOVERNMENT PRINTING OFFICE: 1950 10-1251

TPSN for miscellaneous category (category 9).....	8	
Codes.....	9	
Appendices I and II.....		

1. General.—These regulations establish the troop program sequence number codes (hereinafter referred to as TPSN) for use in presenting the *authorized*, *actual*, and *planned* strength of the Army by organizational structure, in desired sequence. In addition, these regulations establish branch and type of unit codes, as well as uniform abbreviations for organization designations, for use in mechanical strength accounting operations.

2. Purpose.—a. The organizational coding structure established by these regulations is used by the Department of the Army in the preparation of the troop program and troop list (parts I through IV, for the active establishment and civilian components), the Army mobilization plan, and allied planning documents. The foregoing documents present the *authorized* and/or *planned* strength of all components of the Army by organization. They comprise the planning blueprints of the Army, defining the present and projected size, structure, status, and deployment of organizational entities for budgetary, logistical, training, organizational, and personnel planning. The troop program and troop list is comprised of approved troop bases, and various compilations and statistical analyses thereof, designed to fulfill the specialized needs of various planning agencies.

b. The codes and abbreviations established by these regulations are prescribed for use by all major commands in reporting the *actual* strength of the Army by organization.

*These regulations supersede SR 330-105-1, 23 December 49, including C 1, 23 May 50.
906609—50.

c. The utilization of this coding structure to present the authorized, actual, and planned strength of the Army by organization provides a ready means of correlating these strengths at the Department of the Army as well as at the headquarters of major commands.

d. The coding structure is so designed as to identify organizations of a like type, in a logical sequence for planning purposes. It provides a common basis for computing personnel and equipment requirements of the Army. It gives a ready reference to T/O&E organizations, T/D personnel authorizations, and other personnel categories. It may be used by the various command headquarters for audit and reconciliation of the troop program and troop list against their actual organizations, authorizations, and allocations.

3. Definitions.—For the purpose of these regulations, the following basic definitions apply:

a. *Troop program sequence number (TPSN).*—A seven-digit numerical code made up of several subordinate codes and sequencing digits, for use as a means of identifying like organizations and positioning them in desired troop program sequence.

b. *Branch.*—A code established to provide identification of T/O&E organizations with branches of service, and other comparable classifications established for the purpose of personnel allocations.

c. *Type (by) unit.*—A code established to provide identification of organizations with regard to size and position in the chain of command, also to indicate the type of personnel of other than T/O&E or T/D organizations.

d. *Designation.*—Abbreviations of the descriptive portion of the official designation prescribed for T/O&E organizations or abbreviations of the activity titles associated with T/D units or other personnel categories.

e. *Element sequence.*—A code established as a part of the TPSN, but not indicated on the troop program and troop list. It consists of sequencing numbers assigned and maintained in punched card files primarily to position elements of organic units (divisions, engineer special brigades, etc.), or to differentiate between similar T/D units which reflect identical coding for the first five positions of TPSN, unit number, and station. The element sequence digits of TPSN (6 and 7) will be left blank when not used as outlined above, or as otherwise specifically directed.

f. *Organic units.*—Organizations for which there is a master T/O&E and separate T/O&E's for subordinate elements.

4. Structure of TPSN.—a. *Troop program category code (part A, appendix 7).*—This code is established as the first position of TPSN for all Army organizations to provide for groupment on a major

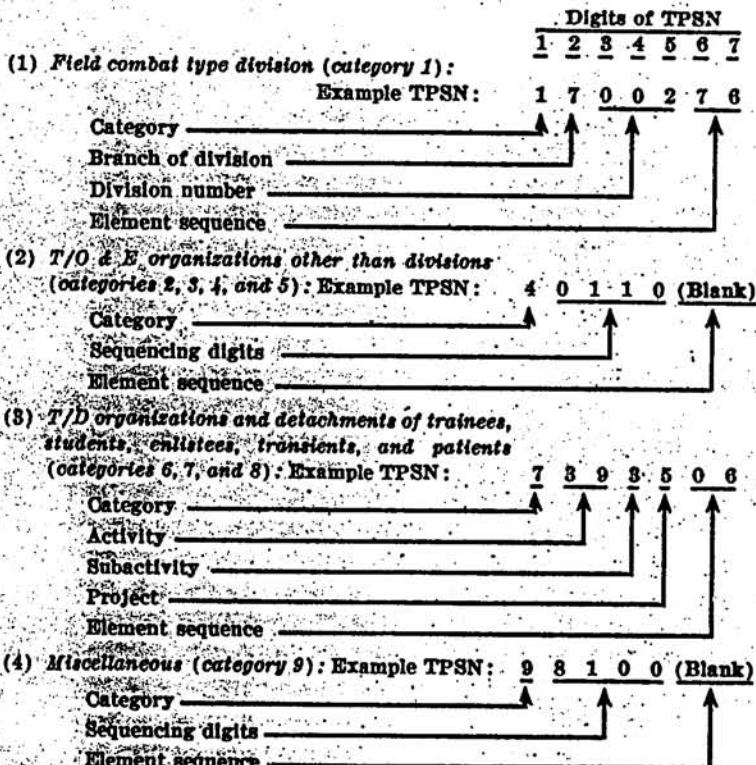

mission basis. Specifically, the code provides for classification of organizations and groups of personnel into the following categories:

- (1) *Category 1—operating forces, field combat type, divisions.*—T/O&E units assigned to divisions, normally a part of a field army.
- (2) *Category 2—operating forces, field combat type, nondivisional.*—T/O&E units organized to perform a tactical combat mission, normally a part of a field army.
- (3) *Category 3—operating forces, field service type, nondivisional.*—T/O & E units organized, to perform a field service logistical mission, normally a part of a field army.
- (4) *Category 4—operating forces, base service type.*—T/O&E units organized to perform nontactical, logistical missions, normally a part of a logistical command of a Communications zone, or continental army.
- (5) *Category 5—operating forces, SCARWAF TNG (special category Army with Air Force).*—Army units in training for assignment to duty with the Air Force by appropriate administrative procedures to provide service support solely to the Air Force. See AR 600-650.
- (6) *Category 6—administrative and logistical base.*—That portion of the Army Establishment which is nonstandard in organization and performs as its primary mission the support of the Army Establishment. Organizations in this category are established as T/D units from personnel authorized as individuals to commands and staff agencies of the Department of the Army.
- (7) *Category 7—training base.*—That portion of the Army Establishment which is nonstandard in organization and performs as its primary mission the education and training of the Army Establishment. It is comprised of T/D units and training personnel enrolled as trainees, students, or enlistees.
- (8) *Category 8—transients and patients.*—Personnel not chargeable to the personnel authorization (T/O & E or T/D) of an organization, composed of personnel in the replacement stream (other than training base personnel) destined for assignment to fill an authorized position vacancy in an organization, personnel in the process of separation from the service, and personnel who have been transferred to a hospital for treatment or determination of duty status.
- (9) *Category 9—miscellaneous.*—Personnel or units not provided for in the above categories, including personnel of the Organized Reserve Corps in an inactive and/or honorary status.

SR 330-105-1

4

b. *Composition of TPSN Code.*—The second through the seventh digits of TPSN vary in composition as applied to the various categories of organizations listed above, explained in paragraphs 5 through 8. The following examples illustrate the composition of the TPSN code as applied to various categories of organizations:

5. *TPSN for field combat type divisions (category 1).*—Organizations of divisions are coded in such manner as to relate all elements to the division by identifying the division number as an integral part of the TPSN and appending an element sequence thereto.

a. *First digit.*—Category.

b. *Second digit.*—The branch of the division as follows:

- 4 Airborne.
- 5 Armored.
- 6 Cavalry.
- 7 Infantry.

c. *Third, fourth, and fifth digits.*—The division number.

SR 330-105-1

5

d. *Sixth and seventh digits.*—Element sequence (par. 3c, and col. 2, part G, app. II), to position the elements in a sequence that expresses, generally, the echelon of each element, i. e.—

Division headquarters.

Headquarters commands.

Division service support.

Combat support (tactical and service).

Combat elements.

6. *TPSN for T/O&E organizations other than divisional (categories 2 through 5).*—All T/O&E organizations not assigned to divisions are positioned within the proper category in alphabetical sequence by branch (part D, app. I), in type of unit (part E, app. I) sequence within branch, by either size or importance, and in alphabetical sequence within type, by unit designation.

a. *First digit.*—Category.

b. *Second, third, fourth, and fifth digits.*—Sequencing number. This is accomplished simply by arranging units in the desired sequence and assigning arbitrary numbers in sequence to the second through the fifth digits of TPSN.

c. *Sixth and seventh digits.*—Blank.

d. *Organic unit number.*—Special provision is made for coding of elements of organic units (e. g., engineer special brigades, ordnance base automotive maintenance battalions, or base armament maintenance battalions) by identifying the organic unit number as an integral part of the TPSN and appending an element sequence thereto.

7. *TPSN for T/D organizations and detachments of trainees, students, enlistees, transients, and patients (categories 6, 7, and 8).*—T/D units of the administrative and logistical base, training base, and detachments of trainees, students, enlistees, transients, and patients are assigned TPSN codes which reflect a breakdown by activity, subactivity, and project codes as explained below.

a. *First digit.*—Category.

b. *Second and third digits—activity code (part C, appendix I).*—The activity code classifies T/D organizations in accordance with unit function or mission. See SR 220-5-20 for definition of activities.

c. *Fourth digit.*—An arbitrary subactivity code assigned when necessary to differentiate between similar organizations having identical activity codes.

d. *Fifth digit—project code (part B, appendix I).*—This code provides an association of activities with major programs of the Army, and is patterned after the fiscal major project account classifications set forth in SR 35-210-1, with minor variations. An explanation of the activities included in each project classification follows:

SR 330-105-1

6

- (1) *Project 1—procurement and production.*—Covers the procurement, by purchase or manufacture, of supplies, materials, and equipment for distribution, such as implements of war, equipment, and supplies utilized directly by troops.
- (2) *Project 2—construction.*—Covers the acquisition or construction of structures, installation of military facilities, acquisition of lands or interests therein, preparation of construction or installation plans and other preliminary matters, and such initial equipment as may be necessary to provide for the operation of such facilities.
- (3) *Project 3—maintenance of structures.*—Covers the maintenance, repair and alteration of facilities, and the operation of utilities.
- (4) *Project 4—operation and maintenance of chattels.*—Covers those activities pertaining to general or overhead operations, including miscellaneous procurement not of major significance under the Army supply program, such as storage, distribution, issuance, and transportation of troops; maintenance and repair of chattels; and other similar activities of an operating and service nature.
- (5) *Project 5—education and training.*—Covers those activities pertaining to educational and training programs, such as operation of technical and tactical schools, and other formal or field training activities.
- (6) *Project 6—research and development.*—Covers those activities pertaining to research and development programs undertaken with a view to improvement in products, materials, or methods.
- (7) *Project 7—departmental service.*—Covers those activities incident to administration of the Department of the Army, as distinguished from administration of the Army Field Establishment.
- (8) *Project 8—training phase.*—Covers personnel (students, trainees, and enlistees) undergoing training at technical or tactical schools or other formal or field training activities as distinguished from the operation of such facilities.
- (9) *Project 9—civil functions—reimbursables.*—Covers those activities of special nature, requiring segregation for specific accounting purposes.

e. *Sixth and seventh digits—element sequence.*—Used only to differentiate between similar T/D units, reflecting identical coding for the first five digits of TPSN, unit number, and station.

SR 330-105-1

7

f. *Tables of distribution training divisions.*—Special provision is made for T/D training divisions (category 7 only) authorized organizational structures based upon T/O&E's, to identify divisions by branch and to provide for relative positions of all elements within divisions, as follows:

- (1) *First digit.*—Category (7 only).
- (2) *Second digit.*—*Branch of the division, as follows:
 - 7 Airborne.
 - 8 Armored.
 - 9 Infantry.
- (3) *Third and fourth digits.*—The last two digits of the division number.
- (4) *Fifth digit.*—The proper project code (part B, app. I). Under training base (category 7) project code 8 will distinguish the students, trainees, and enlistees from the instructors and overhead personnel (project 5) of training divisions.
- (5) *Sixth and seventh digits.*—The same coding as a standard T/O&E division.
- (6) *Examples of training divisional TPSN coding.*—105th Infantry Regiment, 5th Infantry Training Division.

8. *TPSN for miscellaneous category (category 9).*—Personnel or units not provided for in the above categories are positioned by miscellaneous classifications, as convenient.

9. *Codes.*—The detailed codes are contained in appendixes I and II.

a. Appendix I consists of parts A through E as follows:

*This branch code differs from that for field combat type division in order to accommodate mechanical sequencing desired.

SR 330-105-1

8

- A. Category.
- B. Activity.
- C. Project.
- D. Branch of unit.
- E. Type of unit.
- F. (Reserved).

b. Appendix II consists of part G and contains the information shown below, in the columns indicated.

1. Troop program sequence number (first 5 digits).
2. Element sequence (last two digits of TPSN).
3. Branch of unit.
4. Type of unit.
5. Designation.
6. T/O&E number.
7. T/O&E month.
8. T/O&E year.

c. The T/O&E's indicated in part G, appendix II, for a particular type of unit normally reflect the latest proposed or published table of the type indicated. In those instances when organizations are organized under other than the latest tables, and such organizations are, in effect, the same type of unit as those organized under the TPSN indicated for the latest table, if not otherwise specified in the code.

d. Branch of unit code (part D, app. I) is an alphabetical code used in conjunction with TPSN to identify and classify organizations. This code will be used in appropriate fields of punched card records and in authorized, actual, and planned strength documents. This code is applicable to T/O&E units only. Branch field will be left blank for T/D organizations unless otherwise specifically directed.

e. Type of unit code (part E, app. I) is an alphabetical code used in conjunction with TPSN to identify and classify organizations by type. This code will be used in appropriate fields of punched card records and in authorized, actual, and planned strength documents. Although type of unit code for T/D organizations is not indicated in column 4, part G, appendix II, the appropriate code from part E, appendix I, will be applied to T/D organizations (i. e. AAU, ASU, TRD, TSU, and AU).

SPECIAL REGULATIONS
No. 330-170-1

*SR 330-170-1

DEPARTMENT OF THE ARMY
WASHINGTON 25, D. C., 30 September 1949

STATISTICAL AND ACCOUNTING SYSTEM
STATES, TERRITORIES, COUNTIES, AND FOREIGN COUNTRIES
CODE 70

	Paragraph	Page
General	1	1
Codes	2	1
Appendix I. States and Territories		
Appendix II. County Code		
Appendix III. Foreign countries		

1. General.—These regulations establish the codes designed for use in mechanically reporting States, Territories, counties, and foreign countries.

2. Codes.—The detailed codes are presented in appendixes as follows:

a. States and Territories (app. I) are presented in alphabetic sequence in part I and in alphabetic sequence within the respective Army Area, Military District and Territories in Part II.

b. Counties (app. II) are presented in alphabetic sequence within State. The county field for Territories will be coded "000".

c. Foreign countries (app. III) are presented in alphabetic sequence in part I and in numeric code sequence in Part II.
